

# GARDEN GROVE FIRE DEPARTMENT

## FALSE ALARM RESPONSE

All licensed fire alarm and suppression system installation, maintenance and/or repair companies are required to notify the Garden Grove Fire Department's communication center of any work to be performed on a fire alarm and/or suppression system prior to commencement of work. Any work without prior notification that results in a false alarm fire department response will be subject to a fine.

Garden Grove City Council Resolution 9390-16 permits the Garden Grove Fire Department to recuperate costs incurred for fire suppression personnel and fire apparatus use during false fire

alarm response. The fine is \$126 for each false alarm caused by installation, maintenance and/or repair.

### **To avoid a false fire alarm response, the following should be done:**

- Contact Metro Net Fire Communication at (714) 534-4341 prior to commencing work.
  - Put the fire alarm system in test mode.

If you have any questions, please contact the fire department's fire prevention bureau at

(714) 741-5600 during normal business hours. The fire department fire prevention bureau is closed every other Friday. We can also be reached at [firedepartment@garden-grove.org](mailto:firedepartment@garden-grove.org).
