**** SECTION V CONTINUED ****

XYLENE

High concentrations have caused embryotoxic effects in laboratory animals.

Recurrent overexposure may result in liver and kidney injury.

Can be absorbed through the skin in harmful amounts.

ETHYL 3-ETHOXY PROPIONATE

Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother.

First Aid:

Inhalation: If affected by inhalation of vapor or spray mist, remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing difficulty persists, or occurs later, consult

a physician.

Skin or eye: In case of contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact, wash with soap and water. If irritation occurs, contact a physician.

Ingestion: Gastro-intestinal distress.
 In the unlikely event of ingestion, call a physician
 immediately and have names of ingredients available.

Skin or eye contact: May cause irritation of the eyes. Repeated or prolonged skin contact may cause irritation. In case of eye contact, flush with plenty of water for at least 15 minutes, call a physician. For skin contact, wash with soap and water.

***** SECTION VI - REACTIVITY DATA *****

STABILITY STABLE

Incompatibility (materials to avoid): None reasonably foreseeable.

Hazardous decomposition products: CO, CO2, smoke, oxides of heavy metals reported in Section V.

Hazardous polymerization: Will not occur.

***** SECTION VII - SPILL OR LEAK PROCEDURES *****

Steps to be taken in case material is released or spilled: Ventilate area. Remove sources of ignition. Prevent skin

**** SECTION VII CONTINUED ****

contact and breathing of vapor. Confine and remove with inert absorbent.

Waste disposal method: Do not allow material to contaminate ground water systems. Incinerate absorbed material in accordance with Federal, State and local requirements. Do not incinerate in closed containers.

***** SECTION VIII - SPECIAL PROTECTION INFORMATION *****

- Respiratory: Do not breathe vapors or mists. Wear a properly fitted vapor/particulate respirator approved by NIOSH/MSHA (TC-23C) for use with paints during application and until all vapors and spray mists are exhausted. Follow the respirator manufacturer's directions for respirator use.
- Ventilation: Provide sufficient ventilation in volume and pattern to keep contaminants below applicable OSHA requirements and other suggested exposure limits.
- Protective clothing: Neoprene gloves and coveralls are recommended.
- Eye protection: Goggles are preferred to prevent eye irritation. If safety glasses are substituted, include splash guard or side shields.
- Protective creams: Do not use for protection. May be used for ease of clean up.

***** SECTION IX - SPECIAL PRECAUTIONS *****

- Precautions to be taken in handling and storing: Observe label precautions. Keep away from heat, sparks and flame. Close container after each use. Ground containers when pouring. Wash thoroughly after handling and before eating or smoking. Do not store above 120 deg F.
- Other precautions: Do not sand, flame cut, braze or weld dry coating without a NIOSH/MSHA approved respirator or appropriate ventilation.

Extinguishing media: foam , carbon dioxide, dry chemical

Special fire fighting procedures: full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to prevent pressure build-up.

Unusual fire & explosion hazards: when heated above the flashpoint, emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mist or sprays may be flammable at temperatures below the flash point.

***** SECTION V - HEALTH HAZARD DATA *****

ROUTE OF ENTRY

SYMPTOMS/EFFECTS AND FIRST AID

Inhalation: May cause nose and throat irritation. May cause nervous system depression characterized by the following progressive steps: headache, dizziness, nausea, staggering gait, confusion, unconsciousness.

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

Skin or eye contact: May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis.

OTHER POTENTIAL HAZARDS INCLUDE:

ALIPHATIC POLYISOCYANATE RESIN

Repeated exposure may cause allergic skin rash, itching, swelling.

**** SECTION V CONTINUED ****

May cause eye irritation with discomfort, tearing, or blurred vision.

Repeated overexposure to isocyanates may cause lung injury, including a decrease in lung function, which may be permanent.

Overexposure may cause asthma-like reactions with shortness of breath, wheezing, cough, which may be permanent; or permanent lung sensitization. This effect may be delayed for several hours after exposure.

Individuals with preexsisting lung disease, asthma or breathing difficulties may have increased susceptibility to the toxicity of excessive exposures.

BUTYL ACETATE

May cause abnormal liver function.

Tests for embryotoxic activity in animals has been inconclusive.

Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother.

AROMATIC HYDROCARBON

Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors.

First Aid:

Inhalation: If affected by inhalation of vapor or spray mist, remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing difficulty persists, or occurs later, consult a physician.

Flash point (Closed cup): 20 F - +100. Approx. flammable limits: 0.9 -19 %

Extinguishing media: Water spray, foam, carbon dioxide, dry chemical. Special fire fighting procedures: Full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to cool closed containers to prevent pressure build up.

Unusual fire & explosion hazards: When heated above the flash point, emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mists or sprays may be flammable at temperatures below the flash point.

Section V - Health Hazard Data

GENERAL EFFECTS

INGESTION: Gastro-intestinal distress. In the unlikely event of ingestion, call a physician immediately and have the names of ingredients available.

INHALATION: May cause nose and throat irritation, Repeated and prolonged overexposure to solvents may lead to permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are signs that solvent levels are too high. If affected by inhalation of vapor or spray mist, remove to fresh air. If breathing difficulty persists, or occurs later, consult a physician.

SKIN OR EYE CONTACT: May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis. In case of eye contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact wash with soap and water. If irritation occurs, contact a physician.

SPECIFIC EFFECTS

Aromatic hydrocarbon - Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. Butyl acetate - May cause abnormal liver function. Tests for embryotoxic activity in animals has been inconclusive. Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Ethyl acetate - Prolonged and repeated high exposures of laboratory animals resulted in secondary anemia with an increase in white blood cells; fatty degeneration. cloudy swelling and an excess of blood in various organs. Ethyl alcohol - Overexposure may cause eye, nose and throat irritation. Repeated or prolonged contact may cause skin irritation with discomfort and dermatitis. May cause abnormal liver function with iaundice. Tests in laboratory animals have shown cardiovascular system effects. Has shown mutagenic activity in laboratory cell culture tests and in laboratory animal tests. Tests in some laboratory animals indicate this compound may have embryotoxic activity. Tests in animals demonstrate reproductive toxicity. Individuals with preexisting disease of the liver, central nervous system, gastrointestinal tract or reproductive organs may have increased susceptibility to the

toxicity of excessive exposures. Ethylene glycol monobutyl ether acetate - Can be absorbed through the skin in harmful amounts. May destroy red blood cells. May cause abnormal kidney function. Ethylene glycol monobutyl ether - Can be absorbed through the skin in harmful amounts. May cause injury to the kidneys, liver, blood and/or bone marrow. Repeated overexposure may result in damage to the blood. Eye contact may cause comeal injury. Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Ethyl 3-ethoxy propionate - Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Isopropyl alcohol -Ingestion studies on laboratory animals showed that very high oral doses caused increased liver and kidney weights. Methyl amyl ketone - Ingestion studies on laboratory animals showed that very high oral doses caused increased liverand kidney weights. Mineral spirits - Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. May cause temporary upper respiratory and/or lung irritation with cough, difficult breathing, or shortness of breath. Methyl ethyl ketone - High concentrations have caused embryotoxic effects in laboratory animals. Methyl ethyl ketone has been demonstrated to potentiate (i.e., shorten the time of onset) the peripheral neuropathy caused by either n-hexane or methyl n-butyl ketone. MEK by itself has not been demonstrated to cause peripheral neuropathy. Liquid splashes in the eye may result in chemical burns. Methyl isobutyl ketone - Recurrent overexposure may result in liver and kidney injury. Mixed dibasic esters - High airborne levels in rats have shown mild injury to the olfactory region of the nose. Propylene glycol monomethyl ether acetate - May cause moderate eye burning. Recurrent overexposure may result in liver and kidney injury. Toluene - Recurrent overexposure may result in liver and kidney injury. High airborne levels have produced irregular heart beats in animals and occasional palpitations in humans. Rats exposed to very high airborne levels have exhibited high frequency hearing deficits. The significance of this to man is unknown. VM&P naphtha- Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. Xylene - High concentrations have caused embryotoxic effects in laboratory animals. Recurrent overexposure may result in liver and kidney injury. Can be absorbed through the skin in harmful amounts.

Section VI - Reactivity Data

Stability: Stable

Incompatibility (materials to avoid): None reasonably foreseeable Hazardous decomposition products: CO, CO2, smoke. Hazardous polymerization: Will not occur

Section VII - Spill or Leak Procedures

Steps to be taken in case material is released or spilled: Ventilate area. Remove sources of ignition. Prevent skin contact and breathing of vapor. Wear a properly fitted vapor/particulate respirator (NIOSH/ MSHA TC-23C). Confine and remove with inert absorbent.

Waste disposal method: Do not allow material to contaminate ground water systems. Incinerate absorbed material in accordance with federal, state and local requirements. Do not incinerate in closed containers

Section VIII - Special Protection Information

Respiratory: Do not breathe vapors or mists. Wear a properly fitted vapor/particulate respirator approved by NIOSH/MSHA for use with paint during application and until all vapors and spray mists are exhausted. In all cases, follow the respirator manufacturer's directions for respirator use. Do not permit anyone without protection in the

Ventilation: Provide sufficient ventilation in volume and pattern to keep contaminants below applicable OSHA requirements.

Protective clothing: Neoprene gloves and coveralls are recommended. Eye protection: Desirable in all industrial situations. Include splash guards or side shields.

Section IX - Special Precautions

Precautions to be taken in handling and storing: Observe label precautions. Keep away from heat, sparks and flame. Close container after each use. Ground containers when pouring. Wash thoroughly after handling and before eating or smoking. Do not store above 120

Other precautions: Do not sand, flame cut, braze or weld dry coating without a NIOSH/MSHA approved respirator or appropriate ventila-

Skin or eye contact: May cause irritation of the eyes. Repeated or prolonged skin contact may cause irritation. In case of eye contact, flush with plenty of water for at least 15 minutes, call a physician. For skin contact, wash with soap and water.

***** SECTION VI - REACTIVITY DATA *****

-05-1995 12:02

ARRES SECTION VI CONTINUED ARRES

STABILITY STABLE

Incompatibility (materials to avoid): None reasonably foreseeable.

Hazardous decomposition products: CO, CO2, smoke, oxides of heavy metals reported in Section V.

Hazardous polymerization: Will not occur.

***** SECTION VII - SPILL OR LEAK PROCEDURES ****

Steps to be taken in case material is released or spilled: Ventilate area. Remove sources of ignition. Prevent skin contact and breathing of vapor. Confine and remove with inert absorbent.

Waste disposal method: Do not allow material to contaminate ground water systems. Incinerate absorbed material in accordance with Federal, State and local requirements. Do not incinerate in closed containers.

***** SECTION VIII - SPECIAL PROTECTION INFORMATION *****

Respiratory: Do not breathe vapors or mists. Wear a property fitted vapor/particulate respirator approved by NIOSH/MSHA (TC-23C) for use with paints during application and until all vapors and spray mists are exhausted. Follow the respirator manufacturer's directions for respirator use.

Ventilation: Provide sufficient ventilation in volume and pattern to keep contaminants below applicable OSHA requirements and other suggested exposure limits.

Protective clothing: Neoprene gloves and coveralls are recommended.

Eye protection: Goggles are preferred to prevent eye irritation. If safety glasses are substituted, include splash guard or side shields.

Protective creams: Do not use for protection. May be used for ease of clean up.

**** SECTION IX - SPECIAL PRECAUTIONS ****

Precautions to be taken in handling and storing: Observe label precautions. Keep away from heat, sparks and flame.

ARRA SECTION IX CONTINUED ****

P.06

Close container after each use. Ground containers when pouring. Wash thoroughly after handling and before eating or smoking. Oo not store above 120 deg F.

Other precautions: Do not sand, flame cut, braze or weld dry coating without a NIOSH/MSHA approved respirator or appropriate ventilation.

SECTION X - NOTES ***

FLASH POINT (METHOD)
BETWEEN 20 - 73 F (CC)

APPROX. FLAMMABLE LIMITS LEL 1.3 % UEL 19.0 %

Extinguishing media: foam , carbon dioxide, dry chemical

Special fire fighting procedures: full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to prevent pressure build-up.

Unusual fire & explosion hazards: when heated above the flashpoint, emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mist or sprays may be flammable at temperatures below the flash point.

***** SECTION V - HEALTH HAZARD DATA *****

ROUTE OF ENTRY

SYMPTOMS/EFFECTS AND FIRST AID

Inhalation: May cause nose and throat irritation. May cause nervous system depression characterized by the following progressive steps: headache, dizziness, nausea, staggering gait, confusion, unconsciousness.

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

EC-05-1995 12:04

610-458-61

8

**** SECTION V CONTINUED ****

. 2

Skin or eye contact: May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis.

OTHER POTENTIAL HAZARDS INCLUDE:

BUTYL ACETATE

May cause abnormal liver function.
Tests for embryotoxic activity in animals has been inconclusive.
Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother.

N-BUTYL ALCOHOL

Liquid splashes in the eye may result in chemical burns. May cause abnormal blood forming function with anemia. Recurrent overexposure may result in liver and kidney injury.

Can be absorbed through the skin in harmful amounts.

METHYL ISOBUTYL KETONE

Recurrent overexposure may result in liver and kidney injury.

Z TOLUENE

610-458-61

Recurrent overexposure may result in liver and kidney injury.
High airborne levels have produced irregular heart beats in animals and occasional palpitations in humans.
Rats exposed to very high airborne levels have exhibited high frequency hearing deficits. The significance of thisto man is unknown.

ISOPROPYL ALCOHOL

Ingestion studies on laboratory animals showed that very high oral doses caused increased liver and kidney weights.

ETHYL ALCOHOL

Overexposure may cause eye, nose and throat irritation. Repeated or prolonged contact may cause skin irritation with discomfort and dermatitis.

May cause abnormal liver function with jaundice.

Test in laboratory animals have shown cardiovascular system effects.

Has shown mutagenic activity in laboratory cell culture tests and in laboratory animal tests.

Tests in some laboratory animals indicate this compound may have embryotoxic activity.

Tests in amimals demonstrate reproductive toxicity.

)EC-05-1995 1

P. 11

Individuals with preexisting disease of the liver, central nervous system, gastrointestinal tract or reproductive organs may have increased susceptability to the toxicity of excessive exposures.

ITANIUM DIOXIDE

In a lifetime inhalation test, lung cancers were found in some rats exposed to 250 mg/m3 respirable titanium dust. Analysis of the titanium dioxide concentrations in the rat's lungs showed that the lung clearance mechanism was overwhelmed and that the results at the massive 250 mg/m3 level are not relevant to the workplace.

INC PHOSPHATE

Overexposure may cause eye, nose and throat irritation. Repeated or prolonged contact may cause skin irritation with discomfort and dermatitis.

HENOL FORMALDEHYDE POLYMER

This chemical is a formaldehyde donor. Formaldehyde is an IARC, NTP or OSHA carcinogen and has shown mutagenic activity in laboratory cell culture tests. Formaldehyde has produced tumors in the nasal passages of laboratory animals when exposed to high concentrations for a two year period. Epidemiology studies conducted to date have not found evidence of formaldehyde related tumor induction in humans. WARNING: This chemical is known to the State of California to cause cancer.

First Aid:

Inhalation: If affected by inhalation of vapor or spray mist, remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing difficulty persists, or occurs later, consult a physician.

Skin or eye: In case of contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact, wash with soap and water. If irritation occurs, contact a physician.

Ingestion: Gastro-intestinal distress.
In the unlikely event of ingestion, call a physician immediately and have names of ingredients available.

Skin or eye contact: May cause irritation of the eyes. Repeated or prolonged skin contact may cause irritation. In case of eye contact, flush with plenty of water for at least 15 minutes, call a physician. For skin contact, wash with soap and water.

protective equipment including self-contained breathing apparatus. Water spray may be ineffective. If water is used, fog nozzles are preferable. If exposed to fire or extreme heat, water should be used to cool closed containers and prevent pressure build-up or possible auto-ignition.

UNUSUAL FIRE AND EXPLOSION HAZARDS Keep containers tightly closed. Isolate from heat, electrical equipment, sparks, and flame. Vapors may cause flash fire. Vapors may ignite explosively. Vapors may spread long distances and beyond closed doors. Due to pressure build-up, closed containers exposed to extreme heat may explode. Never use a welding or cutting torch on or near container (even empty) as product or its residue may ignite. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SECTION V - HEALTH HAZARD DATA

THRESHOLD LIMIT VAIUE See Section II

PERMISSIBLE EXPOSURE LIMIT See Section II

EFFECTS OF OVEREXPOSURE Acute - Breathing - Irritation of the respiratory tract; he deche, nausea, dizziness, weakness and fatigue. Extreme exposure can result in a sciousness and even respiratory arrest. Eye Contact - Severe irritant. Skin Contact - Prolonged and repeated liquid contact can cause defatting and drying of the skin, which may result in skin irritation and dermatitis. Swallowing - Vomiting may result. Pulmonary aspiration hazard if vomiting occurs.

CHRONIC: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage.

PRIMARY ROUTES OF ENTRY Inhalation, skin contact, swallowing.

EMERGENCY AND FIRST AID PROCEDURES If Breathed - If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, summon medical assistance immediately. If breathing ceases, restore using approved CPR techniques and summon medical assistance immediately. If In Eyes - Flush immediately with large amounts of water for at least 15 minutes. Get medical assistance. If On Skin - Wash affected areas with soap and water. Remove soiled clothing. Get medical assistance if irritation persists. Wash clothing before reuse. If Swallowed - DO NOT INDUCE VOMITING. Consult a physician immediately. Aspiration of vomitus can cause chemical pneumonitis which can be fatal.

MEDICAL CONDITIONS PRONE TO AGGRAVATION BY EXPOSURE
Special Protection Information (Section VIII).

None when used in accordance with

<u>MARNING</u>: Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

Actual (pounds VOC per gallon of product): 5.301 lb/gal

less water and Exempt Solvents: 6.918 lb/gal

SECTION VIII - SPECIAL PROTECTION INFORMATION

ESPIRATORY PROTECTION When used in restricted ventilation areas, wear NIOSH/MSHA approved chemical/mechanical filters designed to remove a combination of particulates ind vapor. When used in confined areas, wear NIOSH/MSHA approved air supply respirators r hoods. Follow respirator manufacturer's directions for respirator use. If espirators are used, a program should be established to assure compliance with OSHA tandard 29 CFR 1910.134.

Use only with adequate ventilation. Use either local exhaust or ENITLATION echanical to meet TLV requirements. Ventilation must be sufficient to limit employee xposure at, or below, applicable health and safety standards. Heavy solvent vapors hould be removed from lower levels of work area.

ROTECTIVE GLOVES Neoprene or equivalent.

Solvent resistant safety eyewear with splash guards. YE PROTECTION

THER PROTECTIVE EQUIPMENT Eye bath and safety shower. Solvent impermeable clothing o prevent skin contact.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING Keep away from heat, sparks and flame. Do not smoke. Extinguish all pilot lights and turn off all sources of ignition including heaters, fans and other non-explosion-proof electrical equipment, during use and until all vapors are gone. Vapors may ignite explosively. Vapors may spread long distances and beyond closed doors. Prevent build-up of vapors by maintaining continuous flow of fresh air. Do not store above 120°F or near fire or open flame. Store large quantities in buildings to comply with OSHA 1910.106. Keep container closed when not in use. Do not transfer contents to bottles or other unlabeled containers. Do not reuse empty containers. Keep out of reach of children.

BOILING RANGE: 209 to 330 Deg F SPECIFIC GRAVITY (H2O=1): 0.8

VAPOR DENSITY: HEAVIER THAN AIR EVAPORATION RATE: SLOWER THAN ETHER

COATING V.O.C.: 6.50 LB/GL (779 G/L) MATERIAL V.O.C.: 6.50 LB/GL (779 G/L)

SOLUBILITY IN WATER: Negligible

APPEARANCE AND ODOR: Water-white liquid with characteristic odor

========= SECTION IV - FIRE AND EXPLOSION HAZARD DATA ============

FLASH POINT: 21 Deg F METHOD USED: SETA

FLAMMABLE LIMITS IN AIR BY VOLUME- LOWER: 1.0% UPPER: 8.0%

EXTINGUISHING MEDIA: FOAM, CO2, DRY CHEMICAL, WATER FOG

SPECIAL FIREFIGHTING PROCEDURES

Use approved self-contained breathing apparatus. Do not use direct stream of water. Water may be unsuitable except as a cooling medium.

UNUSUAL FIRE AND EXPLOSION HAZARDS

A vapor accumulation would flash or explode if ignited.

=================== SECTION V - REACTIVITY DATA

ST ILITY: STABLE CONDITIONS TO AVOID Avoid heat, sparks and open flames.

INCOMPATIBILITY (MATERIALS TO AVOID)

Strong oxidizing agents

HAZARDOUS DECOMPOSITION OR BYPRODUCTS

Thermal decomposition may yield carbon dioxide and/or carbon monoxide.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR

INHALATION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

Inhalation: May cause respiratory tract irritation. Excessive inhalation may cause headache, dizziness, nausea and CNS depression.

SKIN AND EYE CONTACT HEALTH RISKS AND SYMPTOMS OF EXPOSURE Skin and eye contact: May cause irritation to both.

SKIN ABSORPTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

Skin absorption: May cause irritation and drying of skin.

INGESTION HEALTH RISKS AND SYMPTOMS OF EXPOSURE

Ingestion: May cause all symptoms listed below under health hazards.

HEALTH HAZARDS (ACUTE AND CHRONIC)

Acute: May cause eye, nose, skin and respiratory tract irritation, headache, nausea, confusion and reversible eye damage Chronic: Prolonged & repeated exposure may lead to muscular veakness, confusion, impaired coordination, liver and kidney damage, mucous membrane damage, pulmonary edema, anorexia and dermatitis.

CARCINOGENICITY: NTP? NO GIARC MONOGRAPHS? NO OSHA REGULATED? NO

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE

Pre-existing skin disorders, respiratory tract, liver or kidney disease may be aggravated.

EMERGENCY AND FIRST AID PROCEDURES

Inhalation: Remove to fresh air. If breathing stops, give artificial respiration. Splash (eyes): Flush eyes immediately with large amounts of water for at least 15 minutes. Splash (skin): Wash affected areas with soap and water. Remove contaminated clothing. Ingestion: Do not induce vomiting. Give 1/2 pint of milk to drink. If not available, give water. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs. Get medical attention immediately.

======= SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND USE ==========

ST 'S TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Remove all sources of ignition and provide ventilation. Large spills can be collected and atomized in a suitable combustion chamber. Small spills may be picked up with absorbent materials.

WASTE DISPOSAL METHOD

Flace in tightly closed containers and dispose of in accordance with local, state and federal regulations.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Store away from heat, sparks and open flames. Keep containers tightly closed when not in use. Use with adequate ventilation. Avoid prolonged repeated personal contact.

OTHER PRECAUTIONS

Do not take internally. Avoid prolonged contact. Ground equipment to prevent accumulation of static charge.

RESPIRATORY PROTECTION

Use RIOSE-approved self-contained breathing apparatus.

VENTILATION

Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLV.

PROTECTIVE GLOVES

Chemical resistant gloves

EYE PROTECTION

Splash-proof safety goggles

OTHER PROTECTIVE CLOTHING OR EQUIPMENT

Eye bath and safety shower. Apron

WORK/HYGIENIC PRACTICES

Wash hands before eating and using the washroom. Smoke in smoking areas only.

DISCLAIMER

Section III - Physical Data

Evaporation Rate: Slower than ether Gal. Wt. (#/gal): 6.5 - 11.3 Solubility in water: Miscible Volume % volatile: 25% - 100% por Density: Heavier than air Weight % volatile: 0% - 39%

Boiling Range: 26 deg C - 820 deg C

Section IV - Fire & Explosion Data

Flash point (Closed cup): 20° F - +100° F. Approx. flammable limits: 0.8 - 25 %

Extinguishing media: Water spray, foam, carbon dioxide, dry chemical.

Special fire fighting procedures: Full protective equipment, including self-contained breathing apparatus, is recommended. Water from fog nozzles may be used to cool closed containers to prevent pressure build up

Unusual fire & explosion hazards: When heated above the flash point, emits flammable vapors which, when mixed with air, can burn or be explosive. Fine mists or sprays may be flammable at temperatures below the flash point.

Section V - Health Hazard Data

GENERAL EFFECTS

INGESTION: Gastrointestinal distress. In the unlikely event of ingestion, call a physician immediately and have the names of ingredients available.

INHALATION: May cause nose and throat irritation. Repeated and prolonged overexposure to solvents may lead to permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are signs that solvent levels are too high. If affected by inhalation of vapor or spray mist, remove to fresh air. If breathing difficulty persists, or occurs later, consult a physician. SKIN OR EYE CONTACT: May cause irritation or burning of the eyes.

expeated or prolonged liquid contact may cause skin irritation with a comfort and dermatitis. In case of eye contact, immediately flush with plenty of water for at least 15 minutes; call a physician. In case of skin contact wash with soap and water. If irritation occurs, contact a physician.

SPECIFIC EFFECTS

Acrylic polymer - Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis. Aliphatic polyisocyanate resin - Repeated exposure may cause allergic skin rash, itching, swelling. May cause eye irritation with discomfort, tearing, or blurred vision, and a decrease in lung function, which may be permanent. Overexposure may cause asthma-like reactions with shortness of breath, wheezing, cough, which may be permanent; or permanent lung sensitization. This effect may be delayed for several hours after exposure. Individuals with preexisting lung disease, asthma or breathing difficulties may have increased susceptibility to the toxicity of excessive exposures. Aromatic hydrocarbon-1,2 - Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. Butyl acetate - May cause abnormal liver function. Tests for embryotoxic activity in animals has been inconclusive. Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Dibutyl tin dilaurate -Causes eye corrosion and permanent injury. Contact may cause skin burns. Can be absorbed through the skin in harmful amounts. Epoxy resin - Repeated exposure may cause allergic skin rash, itching, swelling. Has shown mutagenic activity in laboratory cell culture tests. Ethyl acetate - Prolonged and repeated high exposures of laboratory animals resulted in secondary anemia with an increase in white blood cells; fatty degeneration, cloudy swelling and a excess of blood in various organs. Ethyl 3 -ethyoxy propionate - Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Ethyl benzene - Recurrent overexposure may result in liver and kidney injury. Studies in laboratory animals have shown reproductive embryotoxic and developmental effects. Has shown mutagenic activity in laboratory cell culture tests. Tests in some laboratory animals demonstrate carcinogenic activity. Ethylene glycol monobutyl ether - Can be absorbed through the skin in harmful amounts. May cause injury to the kidneys, liver, blood and/or bone marrow. Repeated overexposure may result in damage to the blood. Eye contact may cause comeal injury. Has been toxic to the fetus in laboratory animals at doses that are toxic to the mother. Ethylene glycol monobutyl ether acetate - Can be absorbed through the skin in harmful amounts. May destroy red blood cells. May cause abnormal kidney function. Ketone solvent-Inhalation overexposure may cause lung injury, fluid in the lung and difficulty in breathing. Ingestion studies on laboratory animals showed that very high oral doses caused increased liver and kidney weights. High doses in laboratory animals have shown nonspecific effects such as irritation, weight loss, moderate blood changes. Isophorone dilsocyanate trimer-Repeated exposure may cause allergic skin rash, itching, swelling. May cause eye irritation with discomfort, tearing, or blurred vision, and a decrease in lung function, which may be permanent. Overexposure may cause asthma-like reactions with shortness of breath, wheezing, cough, which may be permanent; or permanent lung sensitization. This effect may be delayed for several hours after exposure. Individuals with preexisting lung disease, asthma or breathing difficulties may have increased susceptibility to the toxicity of excessive exposures. Medium mineral spirits - Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. May cause temporary upper respiratory and/or lung irritation with cough, difficult breathing, or shortness of breath. Methyl amyl ketone - Ingestion studies on laboratory animals showed that very high oral doses caused increased liver and kidney weights. Methyl ethyl ketone-High concentrations have caused embryotoxic effects in laboratory animals. Methyl ethyl ketone has been demonstrated to potentiate (i.e., shorten the time of onset) the peripheral neuopathy caused by either n-hexane or methyl n-butyl ketone. MEK by itself has not been demonstrated to cause peripheral neuopathy. Liquid splashes in the eye may result in chemical burns. Methyl isobutyl ketone - Recurrent overexposure may result in liver and kidney injury. n-Butyl alcohol - Liquid splashes in the eye may result in chemical burns. May cause abnormal blood forming function with anemia. Recurrent overexposure may result in liver and kidney injury. Can be absorbed through the skin in harmful amounts. Quartz-crystalline silica - Repeated overexposure to crystalline silica may lead to typical x-ray changes and chronic lung disease. Is an IARC, NTP or OSHA

carcinogen. WARNING: This chemical is known to the State of California to cause cancer. Phosphoric acid - Prolonged skin contact may cause skin burns. Liquid splashes in the eye may result in chemical burns. Titanium dioxide - In a lifetime inhalation test, lung cancers were found in some rats exposed to 250 mg/m³ respirable titanium dust. Analysis of the titanium dioxide concentrations in the rat's lungs showed that the lung clearance mechanism was overwhelmed and that the results at the massive 250 mg/m3 level are not relevant to the workplace. Strontium chromate - Health studies have shown that strontium chromate pigment manufacturing may be associated with an increased risk of lung cancer. Is an IARC, NTP or OSHA carcinogen. WARNING: This chemical is known to the State of California to cause cancer. Toluene - Recurrent overexposure may result in liver and kidney injury. High airborne levels have produced irregular heart beats in animals and occasional palpitations in humans. Rats exposed to very high airborne levels have exhibited high frequency hearing deficits. The significance of this to man is unknown. WARNING: This chemical is known to the State of California to cause birth defects or other reproductive harm. VM&P naphtha - Laboratory studies with rats have shown that petroleum distillates cause kidney damage and kidney or liver tumors. These effects were not seen in similar studies with guinea pigs, dogs, or monkeys. Several studies evaluating petroleum workers have not shown a significant increase of kidney damage or an increase in kidney or liver tumors. Xylene - High concentrations have caused embryotoxic effects in laboratory animals. Recurrent overexposure may result in liver and kidney injury. Can be absorbed through the skin in harmful amounts. Bis(1-2,2,5,6-pentamethyl-4-piperdinyl)sebacate-Repeated exposure may cause allergic skin rash, itching, swelling. Propylene glycol monomethyl ether acetate - May cause moderate eye burning Recurrent overexposure may result in liver and kidney injury. 2,4-Pentandione - Can be absorbed through the skin in harmful amounts. Repeated exposures to high concentrations has caused adverse health effects in laboratory animals. These effects involved the central nervous system, immune system, and the red blood cell forming system. No effect was seen at 100 ppm. The odor is disagreeable at a few ppm. Ingestion may result in gastric disturbances.

Section VI - Reactivity Data

Stability: Stable

Incompatibility (materials to avoid): None reasonably foreseeable Hazardous decomposition products: CO, CO₂, smoke, oxides of heavy metals in Section II.

Hazardous polymerization: Will not occur

Section VII - Spill or Leak Procedures

Steps to be taken in case material is released or spilled: Ventilate area. Remove sources of ignition. Prevent skin contact and breathing of vapor. Wear a properly fitted vapor/particulate respirator (NIOSH/MSHA TC-23C). Confine and remove with inert absorbent.

Waste disposal method: Do not allow material to contaminate ground

water systems. Incinerate absorbed material in accordance with federal, state and local requirements. Do not incinerate in closed containers.

Section VIII - Special Protection Information

Respiratory: Do not breathe vapors or mists. Wear a properly fitted vapor/ particulate respirator approved by NIOSH/MSHA for use with paint during application and until all vapors and spray mists are exhausted. In all cases, follow the respirator manufacturer's directions for respirator use. Do not permit anyone without protection in the painting area. When mixed with activator, also contains polyisocyanate resin. Wear a positive-pressure, supplied-air respirator (NIOSH/MSHATC-19C), eye protection, gloves and protective clothing while mixing activator with paint, during application and until all vapors and spray mists are exhausted. Follow respirator manufacturer's directions for respirator use. Individuals with history of lung or breathing problems or prior reaction to isocyanates should not use or be exposed to this product. Ventilation: Provide sufficient ventilation in volume and pattern to keep contaminants below applicable OSHA requirements. Protective clothing: Neoprene gloves and coveralls are recommended

Eye protection: Desirable in all industrial situations. Include splash

guards or side shields.

Section IX - Special Precautions

Precautions to be taken in handling and storing: Observe label precaution. Keep away from heat, sparks and flame. Close container after each use. Ground containers when pouring. Wash thoroughly after handling and before eating or smoking. Do not store above 120° F

Other precautions: Do not sand, flame cut, braze or weld dry coating without a NIOSH/MSHA approved respirator or appropriate ventilation.

Section X - Additional Information

483-52 aliphatic polyisocy anate resin, aromatic hydrocarbon-1, butyl acetate, ethylene glycol monobutyl ether acetate (3%), propylene glycol monomethyl ether acetate, toluene (8%), GAL WT: 9.05 WT PCT SOLIDS: 75.23 VOL PCT SOLIDS: 69.94 SOLVENT DENSITY: 7.46 VOC: 2.2 H: 3 F: 3 R: 1 FLASH PT: -73L OSHA STORAGE: IB

483-54 dibutyl tin dilaurate, 2,4-pentanedione, GAL WT: 8.13 WT PCT SOLIDS: 1.00 VOL PCT SOLIDS: 0.93 SOLVENT DENSITY: 8.12 VOC: 8.0 H: 2 F: 3 R: 0 FLASH PT: -100L OSHA STORAGE: IC

483-57 aliphatic polyisocyanate resin, aromatic hydrocarbon-1, butyl acetate, ethylene glycol monobutyl ether acetate (3%), propylene glycol monomethyl ether acetate, toluene (6%), GAL WT: 9.05 WT PCT SOLIDS: 75.23 VOL PCT SOLIDS: 69.94 SOLVENT DENSITY: 7.46 VOC: 2.2 H: 3 F: 3 R: 1 FLASH PT: -73L OSHA STORAGE: IB

483-58 aliphatic polyisocyanate resin, aromatic hydrocarbon-1, butyl acetate, ethylene glycol monobutyl ether acetate (3%), propylene glycol monomethyl ether acetate, toluene (8%), GAL WT: 9.05 WT PCT SOLIDS: 75.23 VOL PCT SOLIDS: 69.94 SOLVENT DENSITY: 7.46 VOC: 2.2 H: 3 F: 3 R: 1 FLASH PT: -73L OSHA STOR-AGE: IB

491-21 acrylicpolymer-3, alkyd resin-4, aromatic hydrocarbon-1, butyl acetate, calcium carbonate, iron oxide, methyl amylketone, methyl n-propylketone, quartz-crystalline silica(0.42%), titaniumdioxide, xylene(15%), GAL WT: 12.53 WT PCT SOLIDS: 74.16 VOL PCT SOLIDS: 54.58 SOLVENT DENSITY: 7.13 VOC: 3.2 H: 2 F: 3 R: 0 FLASH PT: -100L OSHA STORAGE: IC

491-22 acrylic polymer-3, alkyd resin-4, aromatic hydrocarbon-1, butyl acetate, calcium carbonate, iron oxide, methyl amylketone, methyl n-propyl ketone, titanium dioxide, xylene(17%), GAL WT: 12.23 WT PCT SOLIDS: 72.31 VOL PCT SOLIDS: 52.50 SOLVENT DEN-SITY: 7.13 VOC: 3.3 H: 2 F: 3 R: 0 FLASH PT: -100L OSHA STORAGE: IC

491-25 barium sulfate, epoxyresin, methyl ethyl ketone (15%), propylene glycolmonomethyl ether acetate, quartz-crystalline silica (26%), strontium chromate (5%), titanium dioxide, toluene (2%), xylene (2%). GAL WT: 13.04 WT PCT SOLIDS: 73.34 VOL PCT SOLIDS: 50.74 SOLVENT DENSITY: 7.06 VOC: 3.4 H: 2 F: 3 R: 0 FLASH PT: -73L OSHA STORAGE: IB

Section 313 Supplier Notification: The chemicals listed above with percentages are subject to the reporting requirements of Section 313 of the Emergency Planning and Right-To-Know Act of 1986 and of 40CFR 372.

Notice: The data in this material safety data sheet relate only to the specific material designated herein and do not relate to use in combination with any other material or process.
