Kyocera Total Document Solution addresses Firm's Needs

Kyocera MFP, PRESCRIBE and PaperCut Business Application Case Study

THE SITUATION

The most effective document management systems are those that provide an integrated solution. Consider a corporation relying on a group of non-networked, single-function devices. When its administrators saw the cost of printing documents, they took a closer look at their fleet. They realized they needed to consolidate redundant devices and create a network of shared multi-function devices. They also expressed a desire to track the usage of each device and user. They felt this would give them more visibility and control over their print environment.

The firm needed an integrated Total Document Solution.

THE CHALLENGE & THE SOLUTION

The administrators entertained bids from two competitive manufacturers and Kyocera—but the first two failed to offer an integrated solution that addressed all of the firm's needs.

The Kyocera dealer suggested replacing the non-networked, single-function devices with three networked TASKalfa color multifunction products (MFPs), each equipped with Papercut MF, a leading print management software package. This system would free the administrators to monitor the print fleet in a single glance. Plus, small RFID stickers could turn ID badges into MFP access cards, allowing the company to track each user's output. The stickers would also eliminate unclaimed print jobs, since users would have to swipe their ID badges to release their printed documents.

The dealer pointed out that Kyocera's native Printer Description Language (PDL), PRESCRIBE, could allow users to easily include the corporate masthead on their print jobs, thus eliminating the cost of expensive stationery.

THE RESULTS

Kyocera's Total Document Solution has satisfied the company's needs. The administrators can track the system holistically—and itemize usage by employee and cost. Redundant and costly single-function devices have been eliminated, and the firm no longer has to pay for expensive corporate letterhead.

THE BENEFITS

The firm now processes all of its documents through one Total Document Solution. It has cut costs and increased visibility within their print environment. What's more, the firm will run more efficiently as it expands and grows.

A Growing Medical Practice Looks to Kyocera's Total Document Solution Approach

A Fleet of over 500 MFPs and Printers, KYOCERA NetAdmin and KYOCERA's KX Driver

THE SITUATION

A medical practice was experiencing strong growth and making numerous acquisitions. Each newly acquired branch had its own unique fleet of office devices, causing integration and management challenges for both corporate IT and branch employees. Logistically, the client needed to standardize their office devices in order to streamline the management and deployment of the fleet. For this organization, a provider who could offer centralized management and a balanced deployment was critical.

THE CHALLENGE & THE SOLUTION

With rapid expansion, the client needed the ability to deploy a standardized fleet of office devices. This would ease the burden on its IT staff, as they would be able to centrally manage and deploy a common fleet of devices. Training and assisting users would also become a more streamlined process.

The client was previously using multiple competitor's MFPs and printers, across 19 locations, all with different print drivers from the various manufacturers. The client had an established relationship with a Kyocera dealer, and the dealer — in conjunction with a Kyocera Business Application Consultant — proposed a new, standardized fleet of Kyocera devices.

The dealer recommended installing a fleet of over 500 Kyocera MFP's and printers, KYOCERA NetAdmin, and KYOCERA's KX Driver. KYOCERA NetAdmin is a device management and reporting software that enables network administrators to centrally control and monitor networked devices. KYOCERA NetAdmin also allows network administrators to easily generate device meter information for internal reporting purposes. KYOCERA's KX Driver, a "single interface" print driver, would also make it easy to manage the print driver fleet. The KX Driver offers the same basic look and feel to the user regardless of the Windows Operating System (OS) or the Kyocera device being used.

Because of the commonality of the devices and the KYOCERA KX Driver, the Kyocera dealer provided an excellent solution to address its client's needs. Together, KYOCERA NetAdmin and KYOCERA's KX Driver also allowed the client to more easily manage their fleet. The dealer also explained that the Kyocera devices, through the HyPAS (Hybrid Platform for Advanced Solutions) platform, are scalable solutions that could grow with the practice as its business needs changed. The HyPAS platform expands the MFP's core capabilities to touch-screen operations that would address future workflow needs.

THE RESULTS

The fleet of Kyocera devices was deployed, KYOCERA's KX Driver and KYOCERA NetAdmin were installed and configured by the IT staff. The IT staff then connected a 70-inch SmartTV to a server hosting KYOCERA NetAdmin, providing them with a real-time dashboard view of their entire fleet across 19 locations, and the ability to quickly troubleshoot common user issues, often before users even report the issue to the IT staff. The result was more streamlined and efficient device management.

THE BENEFITS

The client now has a standardized fleet of Kyocera devices, which using the KX Driver, creates a common user experience regardless of the location. If there are any device issues, they are routed through their HelpDesk using NetAdmin to view device information and diagnose issues.

This information was gathered from several sources, which Kyocera deems reliable and to the best of its knowledge are accurate; Kyocera however shall not be responsible for inaccuracies. Success Story

The Verdict is In! DA's Office turns to Kyocera's Total Document Solutions Approach

Kyocera MFPs, AccessLock™, RightFax Connector and DMS Link™ Business Application Case Study

THE SITUATION

The most efficient infrastructures are those appropriately sized. Although counterintuitive, many organizations are better served by less comprehensive solutions, whose size and power can meet their needs and afford them room to grow—without exceeding their budget.

Consider the district attorney's office that had been relying on a competitor's MFPs equipped with its own proprietary technology. The system offered the administrators the features they wanted—walk-up authentication, full control over scanning, and seamless connection to RightFax—but the fleet was long past its prime and quite expensive to maintain.

THE CHALLENGE & THE SOLUTION

The office began to look for alternate solutions. Their needs were clear: they wanted the same capabilities to which they'd become accustomed, but in a more affordable package.

The customer's Kyocera dealer proposed building a fleet of 47 Kyocera devices. They conducted several walk-throughs, checked meter-counts, and assessed the workflow needs of the office's various departments. Then, after determining the overall document flow of the operation, they suggested a mix of black-and-white A3 devices and one color device.

To customize the system to the office's needs, they equipped all of the devices with a number of Kyocera developed business applications: AccessLock™ for walk-up authentication; RightFax Connector for seamless faxing and outputting of documents; and DMS Link™ for sending scanned documents efficiently into their central database.

THE RESULTS

The office administrators tried the system and agreed that the new Kyocera fleet performed brilliantly, offering improved features and performance over their aging and expensive devices from another manufacturer.

THE BENEFITS

The office's Total Document Solution had all the power, speed, and capabilities of the previous solution at a fraction of the price. The office saved an enormous amount of money in service fees and on their new document management system.

The Kyocera Total Document Solution was flexible and powerful enough to meet the critical business needs of the customer. It met the county's diverse requirements, while also producing significant savings. Consequently, the office will be more productive now and into the future.

This information was gathered from several sources, which Kyocera deems reliable and to the best of its knowledge are accurate; Kyocera however shall not be responsible for inaccuracies. KX DRIVER 7.0

SIMPLIFIED PRINTING, ROBUST FEATURES, ONE COMMON DRIVER.

EXPERIENCE A NEW LEVEL OF EFFICIENCY AND TIME SAVING CAPABILITIES.

KYOCERA KX DRIVER 7.0 BRINGS EFFICIENCY AND TIME SAVING CAPABILITIES TO YOUR PRINTING.

In today's office environment, ease of use, simplicity and functionality are key. The KYOCERA KX Driver™ has been long recognized for its ability to deliver on each of these requirements. Now, the redesigned Windows-compatible KX Driver version 7.0, available for all Kyocera MFPs and printers, takes the user experience to an entirely new level, bringing efficiency and time saving capabilities to your printing.

The KX Driver's redesigned User Interface is based on the concept of unification, and the design is implemented across multiple Kyocera products to create a similar, user-friendly experience, regardless of the device in use.

DRIVING CONTROL THROUGH CENTRALIZED ADMINISTRATIVE OPTIONS

While the KX Driver 7.0 offers robust productivity and time-saving benefits to users, administrators will also appreciate the ease that this driver brings to security and cost control. For example, Chapter Page Insert enables a user to specify the beginning page of a chapter in a document to ensure that the first page of all chapters is printed on the front side of the paper. Users do not have to manually rearrange the layout of pages in the document to achieve this result, because the printer driver will do it automatically during printing. This is just one example of a time saving and efficiency enhancing feature that has been implemented.

POWER YOUR NETWORK PRINTING WITH ADVANCED FUNCTIONALITY

The KX Driver 7.0 offers a suite of enhancements that enables you to harness the full capabilities of your Kyocera MFPs and printers:

- Application based printing brings intelligent print output to your business, allowing you to adjust print settings for different applications (i.e. Microsoft Word, Adobe PDF, etc.)
- E-mail notification informs a selected e-mail address when printing is complete through the Status Monitor
- Security Watermark deters unauthorized copying so you can print secure documents with confidence
- Default print settings on shared drivers allow you to streamline printing functionality

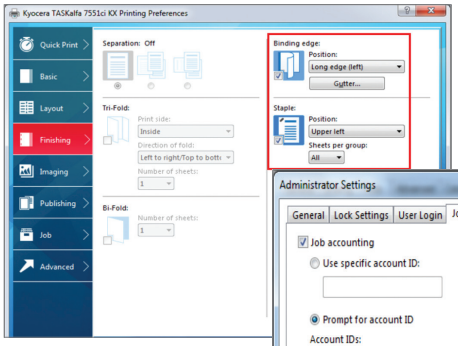
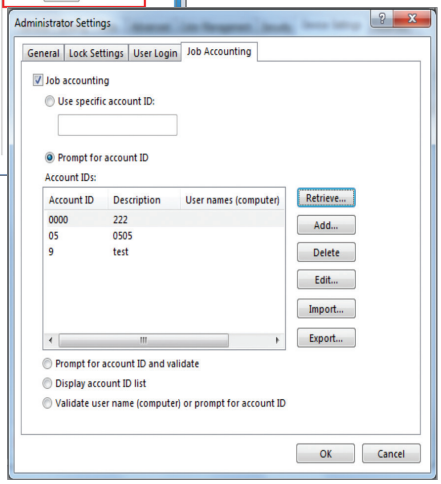
THE BENEFITS OF KYOCERA KX DRIVER 7.0

The KX Driver 7.0 offers all of the features users have come to appreciate in Kyocera's print drivers, and more!

- Simple User Interface design features color tabs, colored dialog box background, and bolding highlights during icon selection.
- Accelerate the printing process by batching copies together with a convenient cover page for each document set, all within a single print job.
- Blank Page Skip feature helps reduce paper waste.
- Retrieve a job accounting list to monitor device usage.
- Maintain the integrity of a chapter's first page with the Chapter Page Insert feature.
- Stapling Position feature provides improved usability by enabling selection of corresponding binding edge.
- Users can change their own user name in the shared printer driver for easier logins without changing the default user name set by an administrator.



Multiple stapling positions that coincide with binding edge selection make finishing a breeze.



The ability to prompt for an account code enhances security at the MFP.

PRINT FILES, WEB PAGES, AND IMAGES ON DEMAND.

MOBILE PRINT EMPOWERS YOUR WORKFORCE WHILE GIVING YOU THE CONFIDENCE IN KNOWING YOU ARE PREPARED FOR ANYTHING AND ABLE TO ACCESS AND PRINT YOUR IMPORTANT DOCUMENTS FROM ALMOST ANYWHERE.

Today's business environment is becoming increasingly mobile. Frequent travel, working between multiple locations, and virtual offices bring with them new demands for on-the-go access to files and documents. Smartphones and tablets meet the need for digital access to content, but digital access is often not enough. The mobile workforce is looking to transform their entire office into a mobile experience, and requires print and scan capabilities that mirror the flexibility of their mobile devices. KYOCERA Mobile Print is a value add app that enables users to securely print documents, web pages, images – as well as copy and print text from a clipboard – on demand from virtually anywhere on their Apple and Android smartphone or tablet devices to select KYOCERA MFPs and printers. As an added feature, users can scan files and images from KYOCERA MFPs to their mobile devices.

The KYOCERA Mobile Print app puts you in control of your document imaging, eliminating the need to carry cumbersome printed files on the chance you need them. Additionally this app eliminates the hassle and lack of security associated with e-mailing files to someone connected to a network in order to have them printed for you.

3 EASY STEPS TO PRINTING ON THE GO

1. Connect your mobile device to the same Wi-Fi network as the KYOCERA MFP or Printer you will be using to print
2. Use the Mobile Print app to open the document, image, text or web page you wish to print
3. Select the device you wish to print to, set your preferences and press Print

TASKalfa 8052ci Series

ADVANCED TECHNOLOGY, WITH POWER TO IMPRESS

The TASKalfa 8052ci Series tackles the most demanding print, copy, scan and optional fax tasks with ease, enabling busy workgroups to accomplish more in less time. Designed as a high-volume document processing hub, the TASKalfa 8052ci Series delivers vibrant, crisp output at up to 70 pages per minute in Color and 80 pages per minute in Black-and-White. Equally impressive, the standard 220 image-per-minute color Dual Scan Document Processor quickly routes your mission-critical files to email, folder, FTP–virtually any destination.

To reduce outsourcing costs and expedite job turnaround, the TASKalfa 8052ci Series supports professional paper handling and in-line finishing accessories. For advanced color graphics applications, the optional Fiery® Controller optimizes color accuracy and consistency. And Kyocera's robust suite of integrated business applications leverage information how, when and where you need it.

The TASKalfa 8052ci Series covers all the bases...user-friendly operation, flexible desktop controls, ultra-reliability and unique long-life technology. The expertly-engineered TASKalfa 8052ci Series drives greater enterprise-wide productivity by simplifying day-to-day document workflow.

INSPIRED INNOVATION, SEAMLESS EFFICIENCY

The TASKalfa 8052ci Series' intuitive display panel, versatile paper handling and exceptional expandability ensures that present and evolving application requirements are met. Engineered to adapt, the TASKalfa 8052ci Series helps build collaborative workgroups by bridging the divide between people and information.

USER-FRIENDLY, TABLET-LIKE OPERATION

The large, tiltable 9" color touch screen display is highly customizable, allowing instant access to frequently-used functions. Organize icons in a layout that works best for you. Personalize the display with your company logo. Help menu and magnification features enable comfortable viewing and enhanced accessibility. A standard soft numeric keypad is incorporated into the display; an optional external hard numeric keypad is available.

HIGH-CAPACITY, FLEXIBLE MEDIA HANDLING

Ideal for high-volume environments, the TASKalfa 8052ci Series offers a standard 4,150-sheet paper supply, upgradable to 7,650 sheets. A maximum of eight trays handle paper sizes up to 12" x 48" (via Multi-purpose Tray) and paper weights up to 166 lb. Index (300gsm). The standard 270-sheet Dual Scan Document Processor gets the job done, quickly and reliably.

ADVANCED FINISHING, WITHOUT THE HASSLE

The optional 4,000-sheet External Finisher streamlines cumbersome manual tasks with 65-sheet multi-position stapling, and support for Booklet Folder/Tri-fold Unit, Multi-bin Mailbox and Hole Punch Unit options.

COLOR PRODUCTION, IN-HOUSE, ON-TIME

For advanced color workflows, the optional EFI® Fiery Printing System is the preferred resource for graphics-rich environments. When combined with the TASKalfa 8052ci Series, you gain powerful color matching and file processing utilities that produce amazing results from job start to job finish.

PROCESS TRANSFORMATION, IN A SINGLE PLATFORM

The unsurpassed performance of the TASKalfa 8052ci Series enables you to better manage virtually every aspect of document creation, output, distribution, storage and retrieval. Your workforce can now communicate and collaborate in a secure, efficient digital workflow, one where people can easily access and share information, and drive business forward.

Fully-configured System, with Optional 4,000-sheet Finisher, Booklet/Tri-fold Unit, Multi-bin Mailbox and 3,500-sheet Side Trays

REMARKABLE VERSATILITY

Produce vibrant color and crisp black-and-white documents at true 1200 x 1200 dpi.

Pay only for the color you use with Kyocera's Tiered Color System.

Scan invoices, statements and forms at up to 220 images per minute, via the standard 270-sheet Dual Scan Document Processor.

Streamline scanning with Blank Page Skip; detects and removes blank pages, saving time and device memory.

Print-from and scan-to a USB thumb drive–directly from the control panel; no PC required.

Print and share frequently-used files with Document Box, a secure area on the hard drive where documents are conveniently stored and easily retrieved.

Optimize device uptime and reduce costs with KYOCERA Fleet Services (KFS), a secure cloud-based monitoring system that offers visibility into settings, consumable levels, usage, and much more.

Distribute scanned files to multiple destinations...email, folder, FTP, etc.

Save time and simplify IT management with KYOCERA's Command Center RX, a standard web-based interface that enables device monitoring, as well as system setting and address book entry/updates...right from your desktop.

Support your mobile workforce by putting print, scan and send features at their fingertips with applications, such as KYOCERA Mobile Print, Apple AirPrint®, and Google Cloud Print™. Standard Near Field Communication (NFC) for Android and Wi-Fi Direct provides added smart device convenience.

Turn scanned documents into searchable PDFs with standard OCR, dramatically reducing the time to locate and replicate information.

Toner Lock prevents accidental removal of cartridges before they are depleted, for uninterrupted workflow.

REMOTE MONITORING REDEFINED

Optimize device uptime and reduce costs with KYOCERA Fleet Services (KFS), a highly-secure cloud-based monitoring solution that offers real-time visibility into...

- Device Status: Take a proactive approach to error resolution to ensure that your fleet operates at peak performance.
- Counter Activity: Eliminate administrative burden with automatic meter reading, for accurate and timely billing.
- Supply Levels: View consumable levels to prevent unnecessary workflow interruptions.
- Usage Trends: Identify print, copy, scan and error code trends to make more informed decisions (fleet right-sizing), and further optimize workflow.

LEVERAGE YOUR INVESTMENT

To enhance the TASKalfa 8052ci Series' core capabilities, and maximize return-on-investment, Kyocera offers a extensive portfolio of customizable business applications. Each is designed using Kyocera's cutting-edge HyPAS technology, a flexible, open platform that seamlessly integrates with the highly-scalable Kyocera MFP. The customized app personalizes system operation to match your specific workflow, for immediate and measurable gains in office productivity.

MAINTAIN DEVICE & DATA SECURITY

To thwart unauthorized access to device functions, and protect confidential information, the TASKalfa 8052ci Series offers standard security features, as well as optional enhancements.

- User Authentication limits MFP access to only those who have a registered login name and password.
- Private Print function temporarily saves print jobs in Document Box and only releases them after entry of a user-defined PIN code on the control panel.
- PDF Encryption restricts access for displaying, printing and editing PDFs by assigning a secure password.
- Optional Data Security Kit for overwrite and encryption, to help safeguard mission-critical workflows.

CONSERVE ENERGY & RESOURCES

The TASKalfa 8052ci Series dramatically reduces waste and unnecessary energy consumption, in order to minimize environmental footprint.

- Unique long-life technology and consumables that reduce waste, lower running costs and minimize service interventions.
- Manage your energy costs. Programmable Energy Saver function and low Typical Electricity Consumption (TEC) values support your energy-saving goals.
- Energy Star® compliant with Low Power Mode and Sleep Mode settings.

And to ensure that your business runs at peak performance, the TASKalfa 6002i Series offers an unmatched array of standard features, professional finishing options, and host of customizable business applications that further optimize workflow. From intuitive walk-up operation to versatile desktop software and Web-based device management tools, your workforce can access, store and route information easier than ever before, whether in the office or on the go.

Indeed, with superior adaptability, the innovative TASKalfa 6002i Series becomes part of an optimized Total Document Solutions (TDS) approach, one that fits the way you do business.

SMART DESIGN. MAXIMUM PRODUCTIVITY. TRUE ECONOMY.

Engineered for ease of operation, the TASKalfa 6002i Series offers workgroups–large and small alike–superior design elements that efficiently address varied media handling, volume and document processing requirements.

INTUITIVE, TABLET-LIKE DISPLAY

Customizable, full color 9" touch screen display allows for instant access to frequently-used functions by organizing icons in a layout that works best for you. A standard soft key numeric keypad is included, and an optional external hard key numeric keypad is available.

WIDE MEDIA SUPPORT, SCALABLE PAPER SUPPLY

Best-in-class media handling and capacity with a 1,150-sheet standard paper supply, upgradeable to 7,150 sheets. Supports media sizes up to 12" x 48" and paper weights up to 166 lb. Index (300 gsm), for unrivaled application flexibility.

ADVANCED IN-LINE FINISHING

Streamline cumbersome manual tasks, and reduce outsourcing costs, with professional finishing options:

- 4,000 Sheet External Finisher
- 1,000 Sheet External Finisher
- 500 Sheet Internal Finisher

CONNECT WITH YOUR INFORMATION.

The TASKalfa 6002i Series enables you to better manage virtually every aspect of document creation, output, distribution and storage. With unsurpassed performance, your workforce can now collaborate and communicate in a secure, efficient digital workflow. This drives greater productivity, increases efficiency, enhances security and reduces costs, as you connect people with your most valuable asset–information.

Produce crisp Black and White documents at resolutions up to 1200 dpi.

Support your mobile workforce by putting print, scan and send features at their fingertips with applications, such as Kyocera Mobile Print, Apple AirPrint®, and Google Cloud Print™. Standard Near Field Communication (NFC) for Android and Wi-Fi Direct provides added smart device convenience.

Scan invoices, statements and forms at up to 180 images per minute, via the optional Dual Scan Document Processor (DP-7110).

Distribute scanned files to multiple destinations...email, folder, FTP, etc.

Streamline scanning with Blank Page Skip; detects and removes blank pages, saving time and device memory.

Turn scanned documents into searchable PDFs with optional OCR, which dramatically reduces the time to locate and replicate information.

Save time and simplify IT management with Kyocera's Command Center RX, a standard web-based interface that enables remote printing, file sharing, device monitoring, settings updates and address book entry, right from your desktop.

Print-from and scan-to a USB thumb drive–directly from the control panel; no PC required.

HARNESS THE POWER.

Kyocera's robust portfolio of customizable Business Applications enhance the TASKalfa 6002i Series' core capabilities, further boosting productivity and ensuring fast return on investment capabilities, further boosting productivity and ensuring fast return on investment.

From document management to cost control and security solutions, Kyocera Business Applications keep your information flowing. Built on Kyocera's cutting-edge HyPAS technology, this flexible software development platform seamlessly and securely integrates with Kyocera MFPs. The advantage? Simplified workflows that enable users to leverage information how, when and where they need it.

Document Solutions

ECOSYS P6035cdn

ECOSYS TECHNOLOGY

KYOCERA's objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted – and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product.

HARNESS THE POWER OF YOUR ECOSYS PRINTER WITH CUSTOMIZED BUSINESS APPLICATIONS

KYOCERA MOBILE PRINT: Simply and conveniently print files, web pages, and images using your smartphone or tablet.

APPLE AIRPRINT: Driverless printing from iOS and OS X products to select KYOCERA devices.

COMMAND CENTER RX: View toner levels, paper availability and device status via users' Web browser.

PRESCRIBE: Create, store and print frequently used forms directly from a KYOCERA printer.

ECOSYS TECHNOLOGY

KYOCERA's objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted – and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product.

DataBank®

THE ALLIANCE ADVANTAGE:
Harnessing the Power of Kyocera & Databank, Together

Your data is your business. Today, storing it more efficiently, accessing it more quickly, and managing it more effectively are essential to running your business more productively. And more competitively.

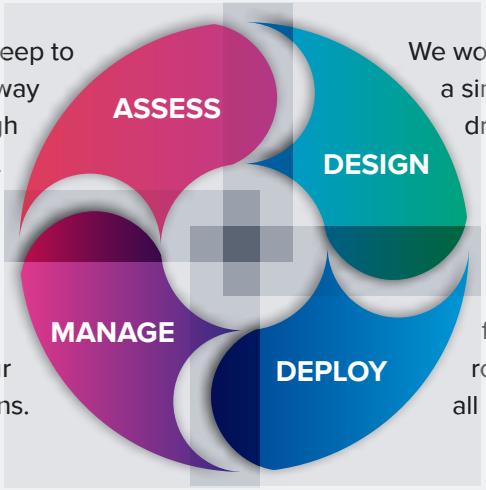
KYOCERA Document Solutions in alliance with DataBank IMX helps clients across industries manage the mission-critical data that drives their business. Our 4-step Business Process Improvement Services methodology begins with a deep-dive assessment of your business, and the unique way your documents and other information are accessed and processed, where, when, and by whom. Ultimately, we implement a customized, scalable platform designed to minimize expense and maximize the productivity of each person within your organization.

The results are immediate. The ROI is measurable. Information – digital or hard copy, archived or new – is captured, indexed, and transformed into living data, accessible anywhere on your network, in the cloud, or on employees' mobile devices. Multiple systems are seamlessly integrated into a single platform.

Simple. Usable. Powerful.

Our specialists dive deep to understand the unique way information flows through your business.

We work with your team to develop a single platform for all data-driven business processes.



Through remote monitoring and ongoing visits, we ensure seamless integration into your day-to-day operations.

We are fully responsible for implementation and roll-out, including training all levels of staff.

We continue to re-assess the platform and the processes it facilitates, then adjust as needed, optimizing it to your evolving business requirements.
