**RE: Report of Geotechnical Services During UST Removal, at Countywide Chrysler Jeep, 10080 Garden Grove Boulevard, Garden Grove, CA
City of Garden Grove Grading Permit Number 43554**

This letter presents the results of geotechnical observation and field density tests performed by Earth Tech, Inc., formerly Rust Environment & Infrastructure (Earth Tech), during removal of three Underground Storage Tanks (UST) at Countywide Dodge, Chrysler, Plymouth, Garden Grove, CA.

Per City of Garden Grove's Underground Tank Removal Permit Conditions, project requirements related to earth work are summarized below:

- Import soil should have an "R" value between 60 and 80, and an expansion index of less than 20.
- In accordance with the Uniform Building Code (UBC), the excavated slope ratio should be 2 ft. Horizontal to 1 ft. Vertical or greater.
- Structural fill should be compacted by mechanical means to at least 90 percent relative compaction. Relative compaction is defined as the measured in-place dry density expressed as a percentage of laboratory determined maximum dry density per ASTM D1557-78M (Method A) Test Method.

LABORATORY TESTING OF BACKFILL MATERIAL

A Class II aggregate base, classified as Brown well-graded sand to silty sand with gravel (SW-SM) per ASTM D 2488 was used for structural fill/backfill. Representative samples of the material were tested for compaction characteristics by Keantan Laboratory of Santa Ana, California. Earth Tech/Rust reviewed the test results and confirmed that this material was appropriate for the structural fill. Laboratory test results summary are presented in Appendix A.

FIELD OBSERVATION AND TESTING

The excavation was conducted by Ecology Control Industries (ECI) using a John Deere 410C backhoe/excavator equipped with a one-foot wide sheepsfoot roller. Earth Tech/Rust observed the bottom of the excavation of all three excavations on August 5, 1998. The three excavation areas

Mr. Yamata
September 29, 1998
Page 2

were all about 12 x 12 feet wide and up to 7.5 feet deep. The three excavations (1, 2 and 3) were located adjacent to garage hoist areas as shown in Figure 1. Earth Tech/Rust verified that previously existing uncertified fill within the excavation area was pre-rolled before backfilling with a sheepsfoot roller attached to a John Deere 410C backhoe in general accordance with the project specifications.

Backfill operations started on August 5, 1998. Earth Tech/Rust provided full-time observation and testing from August 5 to August 7, 1998. Results of Earth Tech/Rust's field density tests are summarized in Table 1.

Backfill materials were placed and spread evenly in 6 to 8-inch loose lifts with the bucket of a John Deere 410C backhoe. The compaction was proof-rolled with a sheeps-foot roller making a minimum of six passes on each lift. In-place density tests (see Appendix B,) were conducted using the sand cone method (ASTM D 1556). A total of 19 in-place density tests were conducted (see Table 1). Areas with non-passing tests were reworked and retested until passing results were obtained (compaction test result for the first lift for Trench No. 2 was slightly below 90%; the lift was re-rolled by contractor prior to placement of the second lift). Approximate locations of the in-place density tests are shown in Figure 1.

CONCLUSIONS

Based on the results of our observation and testing during construction as described above, we conclude that the excavation and the compacted structural fill were constructed in general accordance with the UST permit conditions. If you have any questions, please call us at (714) 251-6400.

Very Truly Yours,

Ray Mehr

Subject: Report/Laboratory Testing Results
Project Name: Countywide Garden Grove
Project No.: N/A
KTL Project No.: 98-057-001

Dear Mr. Mehr:

Enclosed are results of the laboratory testing program conducted on samples from the above referenced project. The testing performed for this program was conducted in general accordance with testing procedures as follows:

TYPE OF TEST
Modified Proctor
Expansion Index
R-value

TEST PROCEDURE
ASTM D 1557
UBC 29-2
ASTM D 2844

The results of this study are presented in the attached Summary of Index Properties Test Results and two Modified Compaction Test Results.

We appreciate the opportunity to provide testing services to RUST. If you have any questions regarding the test results, please contact us.

Very truly yours,
