Garden Grove, CA 92843

Dear Business Owner:

The California State Office of Emergency Services (OES) has asked the Garden Grove Fire Department to assess the potential impact of the year 2000 (Y2K) technology problem in their jurisdiction. The primary challenge is to identify possible system failures related to the Y2K problem that could result in hazardous chemicals released into the environment through spills, explosions, fires or other accidental releases.

We would appreciate your cooperation by answering the following questions as it relates to your facility in Garden Grove.

1. Does your facility have any computer or microchip-controlled storage or processes?

☐ **YES** (Continue to Question 2)

☒ **NO** (Survey is complete. Please sign, date and return to the Garden Grove Fire Department)

*Doug Horney 6-1-99*

2. Have you tested for Y2K compliance?

☐ **YES** (Continue to Question 3)

☐ **NO** (Continue to Question 4)

3. If tested, did the system comply?

☐ **YES** (Passed)

☐ **NO** (System failed. Continue to Question 4)

4. Should a microchip-controlled system involving process or storage of hazardous materials at your facility fail, what would be the result?
