

COVID-19 FRAUDS & SCAMS

PHISHING

Don't trust emails/texts (even from a known source) that only has a short message and a link, or requires "immediate action." Use trusted sources for information and updates.

DONATIONS

Verify your donations are going to a real charity. Ask how your money will be used and pay with a credit card. Don't make donations via gift cards or money orders.

ROBOCALLS

Don't believe calls/text from health experts, government personnel or anyone claiming they have a cure for COVID-19. Government, healthcare and utility agencies will not solicit payments over the phone or text.

MAIL THEFT

Check your mailbox regularly and shred anything with personal information, before throwing it out. Sign up for direct deposit, whenever possible. Pay bills online or place directly into the box, inside the Post Office.
