California’s COVID-19 Pandemic Resilience Roadmap

June 15, 2020
California’s Reopening Approach

We are not using an on/off switch.

We are using a dimmer switch -- based on data and science.

Counties should make data informed decisions for reopening.
California Flattened the COVID-19 Curve

Prepare. Protect. Promote.
Testing has increased, positivity rate has dropped.
Spread Rate of COVID-19 Remains Stable

R>1 - the number of infected persons will increase
R<1 - the number of infected persons will decrease
R=1 - the number of infected persons remains constant
COVID-19 Hospitalizations Remain Stable

Total includes both COVID-19 confirmed positive hospitalizations as well as COVID-19 suspect hospitalizations.

The State is Monitoring and Supporting Counties

**STEP 1**
Active Data Monitoring

- **58 Counties**
  - Providing Daily Data Assessments

**STEP 2**
Targeted Engagement

- **13 Counties**
  - Receiving Targeted Technical Assistance and Support

**STEP 3**
Reinstitute Community Measures
**The State is Closely Monitoring County Data**

These are counties that did not meet threshold for three consecutive days. Metrics are only displayed for counties not meeting threshold.
